

Dominique Gavault

MANAGER OF DOMINIQUE GAVAUPT CONSEIL (SAS) CONSULTANCY FIRM

Dominique Gavault initially had a management role in the analytic accounting and management control areas of the Aérospatiale Group at Marignane and Paris for 14 years. After a few years as Service Manager at Eurocopter, he moved to Mexico for 3 years as General Manager of the Eurocopter subsidiary responsible for the Northern part of Latin America. He then returned to France and created his own company in 2012: Dominique Gavault Conseil (SAS), specialising in advisory services, training and coaching. He works with company managers, other management and students, helping to develop and fulfil their projects. Given this experience and his contacts in Mexico, he is often asked to help French companies to export to Mexico or establish themselves in the country.

Since October 2013, he organises a 4 hour seminar for Masters 2 Students on international commerce and expatriation, focusing on Latin America and the United States.
