

Patrice Roubinowitz

CONSULTANT - SPECIALISING IN LOGISTICS CHAINS

It is not the fashion design sector that I intend to focus on, but my experience in the textile industry. In recent years I have concentrated on developing new textile techniques, which I have subsequently patented. I also created a new line of garments to help people with mobility problems to dress themselves. Most of my career has been involved in the different stages in the logistics chain; in particular I spent 12 years in stock management for the Redoute mail order company.

It is his experience, skills and know-how that he wants to pass on to the M1 Students, with 15 hours of lectures and coursework each semester entitled « Quality Control ».
